PROJECTS / WORK EXPERIENCE

Face recognition Web App

<https://smartbrai.vercel.app>

FLASK – NEXTJS 13 – POSTGRESQL – FIREBASE

- Created a web app that recognizes faces in pictures using the power of AI with **Clarifai's API**.
- Implemented user sessions with **Next-Auth**. Managed user session and storage on Python using **FLask-SQLAlchemy** for **ORM**. Improved API security with **Axios**. Made user input validation with **Zod**. Applied **ShadcdUI** for design. Used **Tailwind** for CSS.

AI Tic-Tac-Toe

<https://github.com/CrisMorinaga/Tic-Tac-Toe>

PYTHON – PYGAME

- Re-created the classic Tic-Tac-Toe game with pure **Python** and the **PyGame** library.
- Features a **player vs player** or a **3-level AI** to compete against. The AI levels range from easy (where you most probably will win as the AI just plays random moves), to hard (where you can only lose or tie).

Chat Room

<https://github.com/CrisMorinaga/ChatRoom>

FLASK – NEXTJS 13 – POSTGRESQL

- Created a chat room that uses WebSockets to create a live connection between users to be able to send real-time messages between them.
- Uses **Flask-SQLAlchemy** for **ORM**. Stablishes a **WebSocket** connection using **Flask-Socketio**. Improved API security with **Axios**. Made user input validation with **Zod**. Applied **DaisyUI** and **ShadcdUI** for design. Used **Tailwind** for CSS.

CrisMorinaga Portfolio

<https://crismorinaga.vercel.app>

NEXTJS 13 – TYPESCRIPT

- Designed and developed a professional portfolio website that showcases projects alongside pertinent personal details.
- Improved API security with **Axios**. Made user input validation with **Zod**. Used **Framer Motion** to add animations. Used **Nodemailer** to send basic emails from the website. Applied **ShadcdUI** for design. Used **Tailwind** for CSS.
